LEEP
LAW ENFORCEMENT ENTERPRISE PORTAL
Service Providers

Capture – Capture provides portal access for select law enforcement, correctional and physical security personnel who directly support the prisoner management and judicial security missions of the U.S. Marshals Service.

Capture Training – The Capture Training Portal provides access to a non-production Capture training environment for select law enforcement, correctional and physical security personnel who directly support the prisoner management and judicial security missions of the U.S. Marshals Service.

Collection of Law Enforcement and Crime Tool (COLECT) – The COLECT enables federal, state, local, tribal, and territorial agencies to submit information to the FBI's Uniform Crime Reporting Program for multiple data collections, including the National Incident-Based Reporting System Collection Application and the number of Law Enforcement (LE) Employees as of October 31 Data Collection.

Cyber Investigation Certification Program (CICP) – The Cyber Investigation Certification Program (CICP) is a multi-level curriculum available to all LEEP users designed to teach law enforcement personnel the technical skills they need to conduct cyber investigations.

The initial module, CICP First Responders was released in 2015 teaches initial responders how to survey and secure today's crime scene with an increasing amount of digital artifacts. It also increases a first responders' technical knowledge by focusing on the investigative methodology specific to a cyber-investigation. The user will build on this knowledge in the next course in the curriculum - CICP Level 1 which was released in 2017. Level 1 is a four-investigation series designed for beginning to intermediate detectives and focuses on four separate technical investigations most common to today's investigators: Digital Harassment, Online Fraud, Child Enticement, and Identity Theft. Level II is currently in development and will focus on advanced cyber investigations.

Cyber Shield Alliance (CSA) – FBI Cybersecurity partnership initiative developed for Law Enforcement (LE) to proactively defend and counter cyber threats against LE networks and critical technologies.

Digital Content Analysis Platform - The Digital Content Analysis Platform (DCAP) is the Operational Technology Division's (OTD) capability for the processing and exploitation of unclassified digital content. Geared especially for the Regional Computer Forensic Laboratories (RCFL), DCAP provides specialized tools and services designed to automate the processing and exploitation of bulk and complex digital data. DCAP is accessible over the internet using any Government-issued device.

Drawbridge - Operation Drawbridge is a Texas DPS border security system which assists federal and state law enforcement agencies in monitoring criminal activity along the Texas-Mexico border. Further access into this site requires additional vetting and approval by the Texas Rangers' Border Security Operations Center (BSOC).

eGuardian – A system that allows law enforcement, law enforcement support and force protection personnel the ability to report, track, and share threats, events, and suspicious activities with a potential nexus to terrorism, cyber or other criminal activity.

eGuardian User Training and Practice – TRAINING USE ONLY-NO data entered here will be processed for action. Practice environment for self-training. Available for eGuardian users to practice creating, deleting, submitting, and approving incidents – alone or with their team. The eGuardian Training environment is generally available between the hours of 7AM ET and 6PM ET Monday through Friday (except federal holidays).

Enterprise File Transfer Service (EFTS) – Provides all LEEP users with a web interface to securely share and transmit files.

FACE Services – The Facial Analysis, Comparison, and Evaluation (FACE) Operations Services at the Criminal Justice Information Services (CJIS) Division provides support in the form of investigative leads for the FBI. Using face recognition (FR) software, Biometric Images Examiners (BIEs) compare submitted photographs of subjects who are the focus of Type 1 & 2, and Type 5 assessments (as well as those under active FBI investigations) with face photos housed in selected internal and external databases.

FBI Virtual Academy (VA) – The FBI's enterprise training system which provides access to all FBI training that is available to the FBI's criminal justice and intelligence partners.

Internet Crime Complaint Center (IC3) – IC3 receives, develops, and refers criminal complaints regarding cyber crime.

Intelink/Intelink Chat – Secure portal for integrated intelligence dissemination and collaboration efforts.

JusticeConnect – JusticeConnect is a criminal justice network which facilitates real-time collaboration, information sharing, partnership development and project management for federal, state, local, tribal and territorial partners in a secure environment.

Justice Enterprise File Sharing (JEFS) – This application provides cloud hosted capabilities for file/folder sharing. It has the ability to transfer files up to 4GB.

Joint Automated Booking System (JABS) – The Joint Automated Booking System (JABS) is a 24-hour, 7 days a week service within the U.S. Department of Justice's (DOJ) Justice Criminal Information Services (JCIS) that provides authorized agencies access to submit biographic and biometric data to FBI CJIS Division Next Generation Identification (NGI) system to independently and conclusively identify persons, as well as query its repository of biographic and biometric arrest data for authorized investigative and administrative purposes. Authorized LEEP Users are granted access to the web-based JABS Query Tool to query the JABS repository for arrest data, to include fingerprints, mugshots, arrestee personal data, offense dates, detention locations, charges, and dispositions. Select Federal LEEP Users may request additional privileges to submit arrest packages to JABS using LEO.gov email.

Law Enforcement Suicide Data Collection (LESDC) -The LESDC obtains incident information on death by suicide, or attempted suicides, within the law enforcement community. The collection of this information is authorized under the LESDC Act, and the general record keeping provision of the Administrative Procedures Act.

Law Enforcement Officers Killed and Assaulted (LEOKA) Program Data Collection – The LEOKA Program Data Collection includes incidents in which law enforcement officers are killed and assaulted in the line of duty. This data is collected for publication, research, and instructional purposes. Through these services, LEOKA strives to provide potentially lifesaving information.

National Data Exchange (N-DEx) – The National Data Exchange, or N-DEx System, provides federal, state, local, and tribal criminal justice agencies with a mechanism to nationally share, search, link, and analyze investigative information across jurisdictional boundaries.

National Domestic Communications Assistance Center (NDCAC) – NDCAC serves as an assistance center, which is designed to focus on law enforcement's challenges with communication services. In response to these challenges, NDCAC provides innovative technical solutions, training, and coordination needs to State, Local, Tribal, Territorial, and other Federal, Law Enforcement Agencies.

National Gang Intelligence Center (NGIC) – A multi-agency effort that integrates gang information from local, state, and federal law enforcement entities to serve as a centralized intelligence resource for gang information and analytical support.

National Use-of-Force Data Collection – The National Use-of-Force Data Collection is a statistical collection concerning law enforcement use of force that results in one of the following circumstances: the death of a person; the serious bodily injury of a person; or when a law enforcement officer discharges a firearm at or in the direction of a person.

NICS E-check – National Instant Criminal Background Check System Electronic Check (NICS E-Check) – The NICS E-Check can be used by law enforcement/criminal justice agencies conducting firearm background checks for authorized purposes.

Protective Intelligence eXchange (PIX) – Information Sharing System designed to assist US law enforcement agencies providing protective services to public officials in assessing the risk of an unwanted outcome that a person of interest may pose to a protected person. PIX is a database containing the names and selected identifiers of persons subject to a protective intelligence investigation by member agencies.

Regional Information Sharing Systems network (RISSNET) – The RISSNET Portal provides secure access to services and resources to more than 9,000 local, state, tribal, and federal law enforcement agencies as well as public safety and Critical Infrastructure/Key Resource (CI/KR) communities. RISS' federated partnership with LEEP allows RISS to provide different levels of authorization to LEEP users based upon user attributes sent to RISS by the LEEP on behalf of the user.

Relativity - The Department of Justice's Criminal Division Relativity Service is for joint cases with the Criminal Division where the Criminal Division hosts the records on their Relativity environment.

Scrap Theft Alert – Web-based theft alert system developed by the Institute of Scrap Recycling Industries, Inc. to help in the fight against metals theft. STA is available <u>free of charge</u> to law enforcement, recyclers, corporate security, and property owners. Registration is easy and allows registered users to post theft alerts that are broadcast to all system users within a 100-mile radius via their email address. This radius can be expanded when warranted.

Seed Identification (SeID) – SeID is a web page application to assist with the identification of toxic and/ or drug related seeds. SeID provides detailed species characteristics, known uses of the seeds, toxins associated with the seeds, routes of exposure to the toxins, and symptoms of exposure to the toxins.

SORNA Exchange Portal – The SORNA Exchange Portal is an online information sharing system for SORNA jurisdictions (states, tribes, territories, and DC). The portal facilitates the sharing of sex offender registration information between SORNA jurisdictions, and is only accessible by sex offender registry officials and authorized criminal justice personnel.

Special Interest Group (SIG) – A Special Interest Group (SIG) is a web-based platform which is designed to allow local, state, tribal, federal and international partners to share and store information as a means to enhance collaboration with law enforcement, intelligence and emergency management communities. In conjunction with the launch of JusticeConnect, SIG requests are now being reviewed and created on a case-by-case basis. You can obtain additional information on JusticeConnect by logging into LEEP and selecting the JusticeConnect icon.

Symphony - Symphony provides self-service Machine Translation for over 80 languages through a graphical user interface. Symphony can process either files or text entered by the user. Symphony also includes Name Transliteration and Speech-to-Text. Future updates to Symphony will include Optical Character Recognition (OCR).

Teleporter – A system that allows operational-related files to be shared and moved between law enforcement and partner communities including: state, local, tribal, foreign LE, OGA, and private sector partners. Teleporter is available to anyone who maintains a trusted relationship with the FBI and any individual may be granted temporary access to the Teleporter to simply upload/download files.

Texas DPS Alert Flyer Creation/Distribution (TxAlerts) – An alert flyer application allowing Texas Law Enforcement Agencies to build and distribute flyers for AMBER, Blue, Silver and Missing Endangered individuals.

TXMAP – Texas Department of Public Safety (TXDPS) manages a web mapping and reporting application, TXMAP, for the purpose of facilitating the visual representation and spatial analysis of incident data that includes criminal offenses and investigations, emergency management information, infrastructure data and DPS asset data.

Uniform Crime Reporting (UCR) Dashboard – A system used by UCR contributors to view and validate data.

Uplift Service – allows all FBI users to transfer files to FBINet.

VALOR Officer Safety and Wellness Program (VALOR) – The Department of Justice, Bureau of Justice Assistance, VALOR Officer Safety and Wellness Program provides critical, no-cost on-site training, eLearning, resources and technical assistance with the goal of changing officers' behaviors to increase their safety and wellness. LEEP law enforcement users have full access to focused materials including posters, research articles, videos, online training, bulletins, and podcasts on the VALOR Program website.

Virtual Command Center (VCC) – The VCC is a secure common operating platform providing seamless, real-time, situational awareness and critical information management.

Violent Criminal Apprehension Program (ViCAP) – ViCAP is a repository for behavioral and investigative information related to criteria Homicides, Sexual Assaults, Missing Persons, and Unidentified Human Remains cases. Authorized users can click on the ViCAP logo to access the database. All other users can go to the ViCAP JusticeConnect page to obtain information about gaining access and view various ViCAP documents and resources.

WHOIS Portal – The WHOIS Portal provides Sworn Law Enforcement access to website owner information in compliance with the European General Data Protection Regulation (GDPR). This tool allows registrars to provide unredacted information to law enforcement and authenticate legitimate law enforcement queries of WHOIS data.
